## Assignment# 2

### Screenshots:

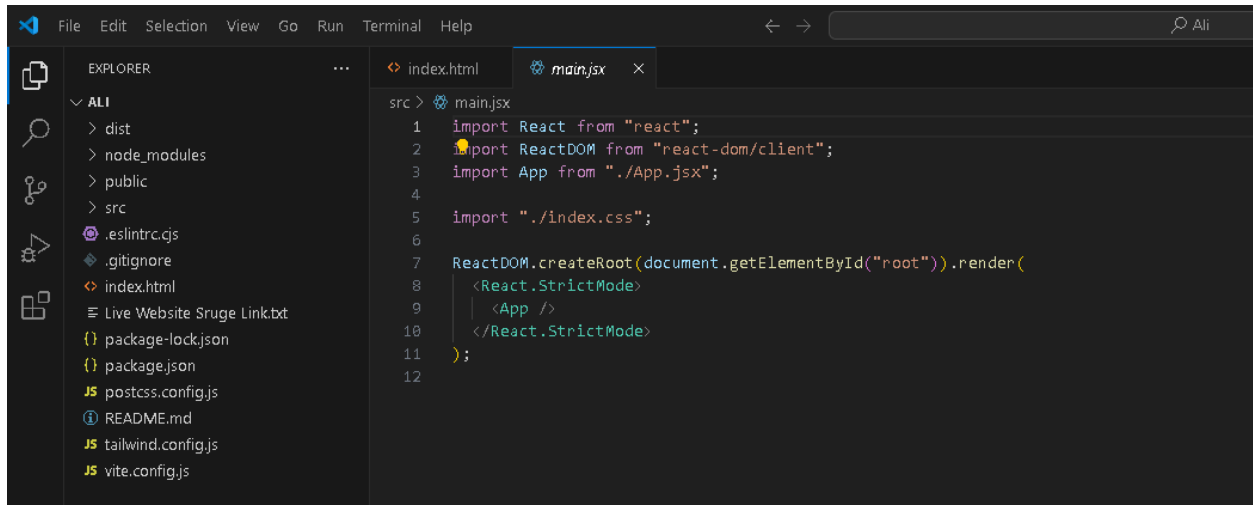

The screenshot shows the VS Code editor with the Explorer sidebar on the left. The file explorer shows a project structure with folders like 'dist', 'node\_modules', 'public', and 'src'. The 'src' folder is expanded, showing files like 'App.jsx', 'index.css', and 'main.jsx'. The 'main.jsx' file is selected and its content is displayed in the editor. The code imports React, ReactDOM, and App, and uses ReactDOM.createRoot to render the App component into the root element of the document.

```
1 import React from "react";
2 import ReactDOM from "react-dom/client";
3 import App from "./App.jsx";
4
5 import "../index.css";
6
7 ReactDOM.createRoot(document.getElementById("root")).render(
8   <React.StrictMode>
9     <App />
10  </React.StrictMode>
11 );
12
```

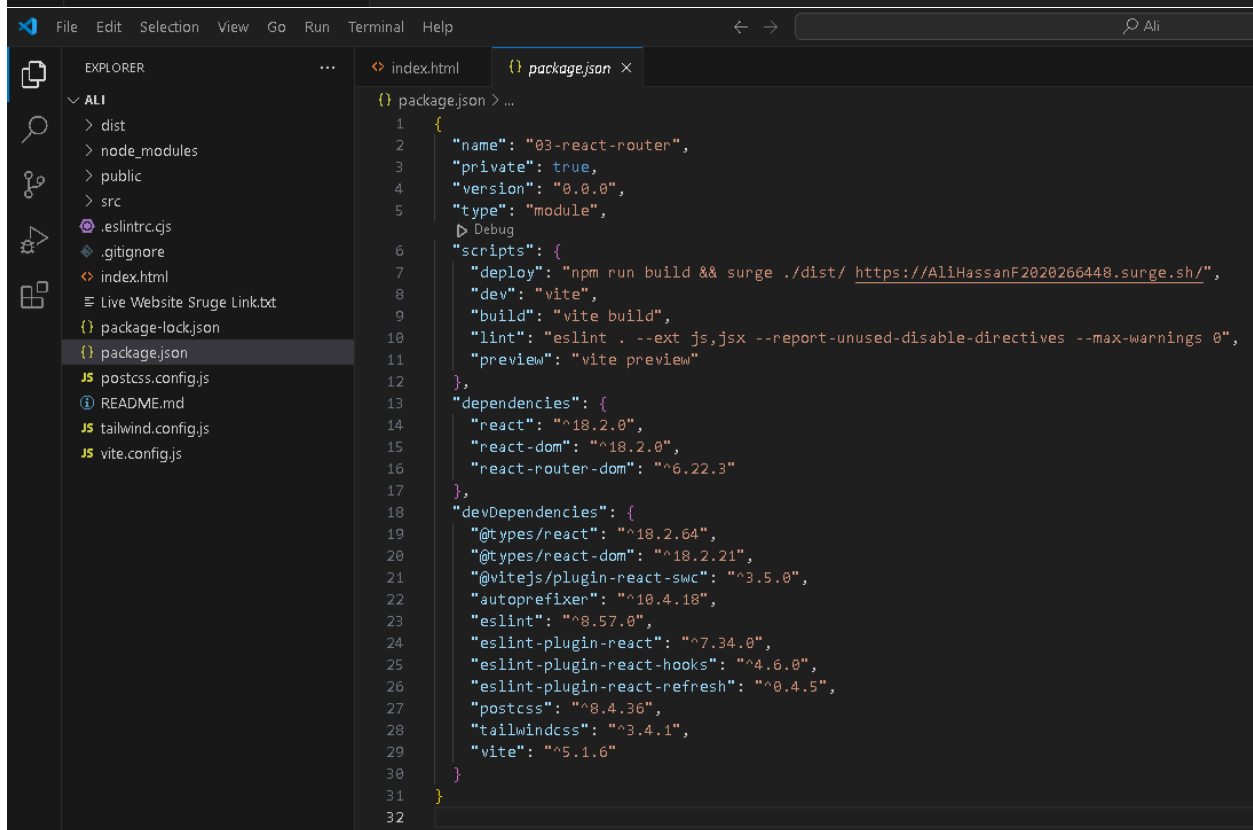

The screenshot shows the VS Code editor with the Explorer sidebar on the left. The file explorer shows the same project structure as the first screenshot. The '.eslintrc.cjs' file is selected and its content is displayed in the editor. The file contains ESLint configuration settings, including environment, extends, ignorePatterns, parserOptions, settings, plugins, and rules.

```
1 module.exports = {
2   root: true,
3   env: { browser: true, es2020: true },
4   extends: [
5     'eslint:recommended',
6     'plugin:react/recommended',
7     'plugin:react/jsx-runtime',
8     'plugin:react-hooks/recommended',
9   ],
10  ignorePatterns: ['dist', '.eslintrc.cjs'],
11  parserOptions: { ecmaVersion: 'latest', sourceType: 'module' },
12  settings: { react: { version: '18.2' } },
13  plugins: ['react-refresh'],
14  rules: {
15    'react/jsx-no-target-blank': 'off',
16    'react-refresh/only-export-components': [
17      'warn',
18      { allowConstantExport: true },
19    ],
20  },
21 }
22
```

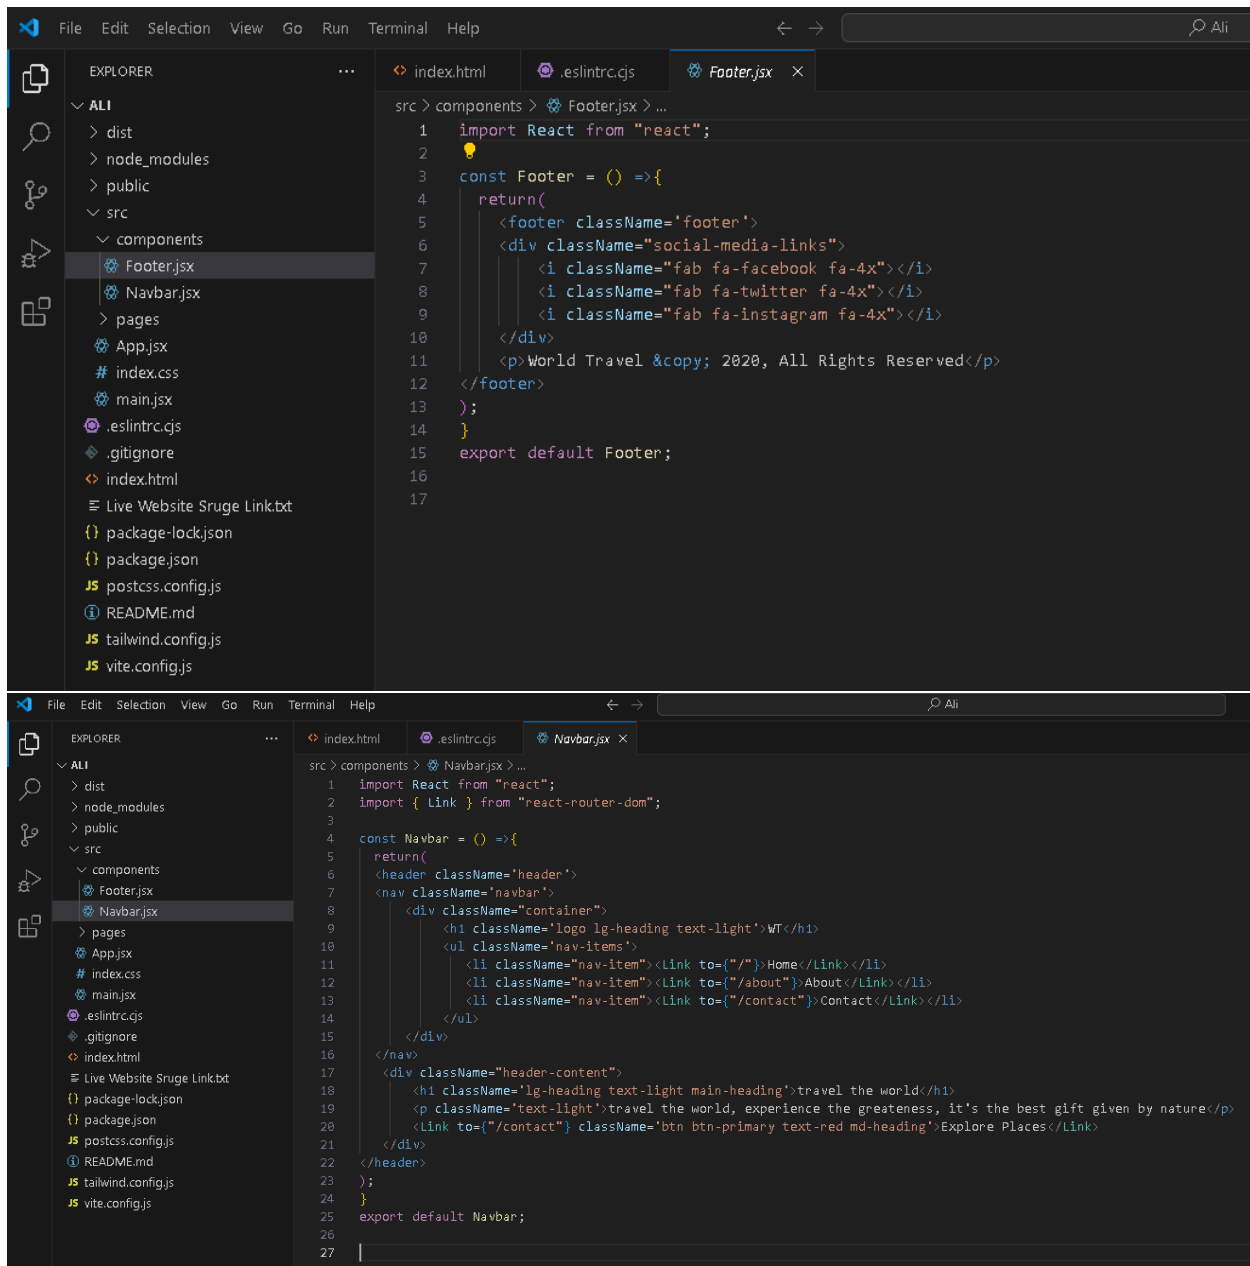

The screenshot shows the VS Code editor with the Explorer sidebar on the left. The Explorer sidebar shows a project structure for 'ALI' with folders 'dist', 'node\_modules', 'public', and 'src'. Files include '.eslintrc.cjs', '.gitignore', 'index.html', 'package-lock.json', 'package.json', 'postcss.config.js', 'README.md', 'tailwind.config.js', and 'vite.config.js'. The main editor displays the 'main.jsx' file with the following code:

```
1 import React from "react";
2 import ReactDOM from "react-dom/client";
3 import App from "./App.jsx";
4
5 import "./index.css";
6
7 ReactDOM.createRoot(document.getElementById("root")).render(
8   <React.StrictMode>
9     <App />
10  </React.StrictMode>
11 );
12
```

The screenshot shows the VS Code editor with the Explorer sidebar on the left. The Explorer sidebar shows the same project structure as the previous screenshot, but the 'package.json' file is selected. The main editor displays the 'package.json' file with the following code:
